STEM Program and Author Visits

Interactive storytelling, discovery and creativity

A playful, hands-on experience combining picture books, early STEM concepts, movement and simple wellbeing strategies.

KINDER–YEAR 2

Take home:

A pollen craft sheet and Beneficial Bug Mix seeds to plant.

What students experience:

Storytime & storytelling:

Discover how authors find ideas and how everyone can be a storyteller through reading, drawing, talking and imagining.

Nature & STEM:

Explore bees, flowers, pollination, insects, seeds, plants and seasonal change through questions, discussion and interactive games.

Mindful breathing:

Meet Leo the Lion and Ribbet the Rabbit to practise simple breathing strategies for managing big energy and finding calm.

Social-emotional learning:

Talk about friendship, patience, resilience, different bodies and brains, and understanding others.

Movement & language:

Become trees, flowers, bees and other garden visitors; explore action words, or verbs, through imaginative movement and freeze games.

Creative follow-up:

Optional classroom activities include drawing bees and flowers and adding pollen, extending the learning after the visit.

Curriculum Connections:

Early science, biological sciences, seasonal change, oral language, literacy, movement, creativity and personal and social capability.

Group size:

Designed for individual classes of approximately 20–30 students.

Larger cohorts can be accommodated through multiple sessions.

Sessions:

Kinder–Prep:
30 or 45 minute sessions

Years 1–2:
30, 45 or 60 minute sessions

Note: POA. Pricing is dependent on the number of sessions booked, group sizes and travel requirements.
